

Repurposed hardwood lining

Description

barnWALL is a natural timber wall lining that has been repurposed from ageing, disused hardwood, that was once destined to be forgotten.

barnWALL has a natural ashen patina, created by years of harsh weathering, which can be seen on each individual piece. This establishes a very unique industrial look that will transform the identity of a space, creating a raw modern atmosphere.

Including only the most individual naturally occurring and man-made features, barnWALL is a high feature product that complements any interior bringing a brutal rustic sawn look and feel.

Although barnWALL has an authentic aged appearance it has been dried, machined & manufactured to strict modern tolerances.
